NUMBER 1

Y. Chen	1	Refined and simplified methods of lateral load distribution for bridges with unequally spaced girders: I. Theory
Y. Chen	17	Refined and simplified methods of lateral load distribution for bridges with unequally spaced girders: II. Applications
J. Petrolito	33	Stiffness analysis of beams using a higher-order theory
S. Chakraborty and **S. S. Dey**	41	Stochastic finite element method for spatial distribution of material properties and external loading
J. H. Liu and **K. S. Surana**	47	Piecewise hierarchical *p*-version curved shell element for geometrically nonlinear behavior of laminated composite plates and shells
J. H. Liu and **K. S. Surana**	67	Piecewise hierarchical *p*-version axisymmetric shell element for geometrically nonlinear behavior of laminated composites
C. T. F. Ross	85	Vibration and elastic instability of thin-walled conical shells under external pressure
Jun Lu, D. W. White, Wai-Fah Chen and **H. E. Dunsmore**	95	A matrix class library in C++ for structural engineering computing
Zou Guiping and **Tang Limin**	113	A semi-analytical solution for thermal stress analysis of laminated composite plates in the Hamiltonian system
Qingbo Ao	119	A new boundary element method for plane anisotropic elasticity
J. A. Alduaij and **H. Al-Khaiat**	127	Dynamic response of reticulated structures by the equivalent kinetic energy approach
Soon Huat Tan and **Leong Keey Seah**	133	Flexibly-connected thin-walled framework
Ai-Kah Soh and **Chee-Kiong Soh**	141	Stress analysis of axially loaded T tubular joints reinforced with doubler plates
Shen Pengcheng and **He Peixiang**	151	Bending analysis of plates and spherical shells by multivariable spline element method based on generalized variational principle
Benli Wang, Jindong Hu, Xianren Kong and **Chengjie Zhao**	159	Numerical simulation for the hydrobulging process of a polyhedric shell
Xianren Kong, Benli Wang and **Jingdong Hu**	163	Dynamic snap buckling of an elastoplastic shallow arch with elastically supported and clamped ends
Chen Yuhua	167	Large deflection analysis of structures by an improved combined finite element–transfer matrix method

CAS 55/6—M

Technical Notes

José María Mínguez 173 Calculation of buckling loads of reinforced panels

R. Jones, S. Hammond, J. F. Williams and **M. Heller** 177 A numerical study of MSD in aluminium alloys

A. Recuero, O. Río and **J. P. Gutiérrez** 185 Uneven dynamic response of floors in a sports pavilion

I Software Survey Section

NUMBER 2

K. M. Liew, L. Jiang, M. K. Lim and **S. C. Low** 191 Numerical evaluation of frequency responses for delaminated honeycomb structures

A. Kumar, S. Singh and **R. Kumar** 205 Stresses and deformations due to flow past a circular cylinder

M. M. Hamed and **M. A. Ajiz** 211 Fast dynamic multilayer data structure to implement Gram–Schmidt orthogonalization algorithm (FDM)

Zhiping Qiu, Suhuan Chen and **Hongbo Jia** 221 The Rayleigh quotient iteration method for computing eigenvalue bounds of structures with bounded uncertain parameters

N. I. Ioakimidis and **G. T. Anastasselos** 229 Solution of plane elasticity problems with Mathematica

M. A. Gutiérrez, R. de Borst, J. C. J. Schellekens and **L. J. Sluys** 237 An algorithm for mesh rezoning with application to strain localization problems

P. Procházka and **M. Šejnoha** 249 Development of debond region of lag model

M. S. Kaschiev and **K. Mikhajlov** 261 A beam resting on a tensionless Winkler foundation

D. V. Griffiths and **D. J. Kidger** 265 Enhanced visualization of failure mechanisms by finite elements

C. Meimaris and **J. D. Day** 269 Dynamic response of laminated anisotropic plates

T. K. Paul and **K. M. Rao** 279 Flexural analysis of laminated composite plates containing two elliptical holes using higher-order shear deformation theory

Jae Han Lee and **Byung Man Kwak** 287 Reliability-based structural optimal design using the Neumann expansion technique

T. J. R. Hughes, A. Masud and **I. Harari** 297 Numerical assessment of some membrane elements with drilling degrees of freedom

J. Mottl	315	Solution of structure system optimization formulated as a bivalent nonlinear programming problem using the method of contractual tangent planes
Zhiming Ye and **R. P. S. Han**	325	On the nonlinear analysis of orthotropic shallow shells of revolution
F. Fayos	333	Non-linear behaviour of critical structures: analytical approach by computer
Tian Quan Yun and **Linhong Li**	341	Analysis of in-plane-hinge-jointed rigid sloping piles
S. N. Al-Zubaidy	347	A proposed design package for centrifugal impellers
N. Sundarraj, B. Dattaguru and **T. S. Ramamurthy**	357	Analysis of a double shear lap joint with interference fit pin
		Technical Note
A. S. Al-Gahtani, S. S. Al-Saadoun and **E. A. Abul-Feilat**	365	Design optimization of continuous partially pre-stressed concrete beams
	I	Software Survey Section

NUMBER 3

A. Farahyar and **W. K. Skeehan**	371	An anisotropy theory of viscoplasticity for thermo-mechanical deformations
Jong-keun Choi and **Jang-keun Lim**	379	General curved beam elements based on the assumed strain fields
K. Natarajan and **A. R. Santhakumar**	387	Reliability-based optimization of transmission line towers
A. M. Horr and **L. C. Schmidt**	405	Closed-form solution for the Timoshenko beam theory using a computer-based mathematical package
H. A. El-Ghazaly and **H. A. Al-Khaiat**	413	Analysis and design of guyed transmission towers—case study in Kuwait
N. I. Ioakimidis	433	Determination of critical buckling loads with Gröbner bases
E. C. Zacharenakis	441	Input–output decoupling and disturbance rejection problems in structural analysis
M. Iura and **S. N. Atluri**	453	Dynamic analysis of planar flexible beams with finite rotations by using inertial and rotating frames
L. Parietti, S.-Y. Hsu and **O. H. Griffin, Jr**	463	Mini-constitutive finite element model for plastic response of unidirectional fiber composites

Y. Pressburger and **R. Perucchio** 471 A hierarchical two-level multigrid solver

Yunliang Ding and **Junping Hou** 485 General buckling analysis of sandwich constructions

A. Eriksson and **R. Kouhia** 495 On step size adjustments in structural continuation problems

Seung Jo Kim and **Jin Hee Kim** 507 Finite element analysis of laminated composite plates with multi-pin joints considering friction

Li-ren Tsau and **Chyuan-huei Liu** 515 A comparison between two optimization methods on the stacking sequence of fiber-reinforced composite laminate

J. H. Liu and **K. S. Surana** 527 A *p*-version curved shell element based on piecewise hierarchical displacement approximation for laminated composite plates and shells

A. Ranjbaran 543 A computer model for the analysis of masonry columns

A. Ranjbaran 553 Advanced implementation of the boundary element method in elastostatics

I Software Survey Section

NUMBER 4

Li-Ren Tsau, Yu-Hsiung Chang and **Fu-Lai Tsao** 565 The design of optimal stacking sequence for laminated FRP plates with inplane loading

J. H. P. de Vree, W. A. M. Brekelmans and **M. A. J. van Gils** 581 Comparison of nonlocal approaches in continuum damage mechanics

M. Raoof and **I. Kraincanic** 589 Simple derivation of the stiffness matrix for axial/torsional coupling of spiral strands

M. Resheidat, M. Ghanma, C. Sutton and **Wai-Fah Chen** 601 Flexural rigidity of biaxially loaded reinforced concrete rectangular column sections

H. P. Lee 615 Dynamic response of a multi-span beam on one-sided point constraints subject to a moving load

Chongbin Zhao and **S. Valliappan** 625 Finite element modelling of methane gas migration in coal seams

N. Ben Kahla 631 Equivalent beam–column analysis of guyed towers

Yeh-Liang Hsu, S. D. Sheppard and **D. J. Wilde** 647 The curvature function method for two-dimensional shape optimization under stress constraints

Y. P. Shen, Norio Hasebe and **L. X. Lee** 659 The finite element method of three-dimensional nonlinear viscoelastic large deformation problems

A. Joseph Stanley and **N. Ganesan** 667 Dynamic response of cantilever cylindrical shells with discontinuity in thickness subjected to axisymmetric load

A. K. Mitra and **B. Ghosh** 687 Interfacial stresses and deformations of an adhesive bonded double strap butt joint under tension

Shyue-Jian Wu and **Pei-Tse Chow** 695 Integrated discrete and configuration optimization of trusses using genetic algorithms

Wang Xucheng and **Wang Xiaoning** 703 Simplified method for elasto-plastic finite element analysis of hardening materials

S. Rajendran, M. R. Raghavan and **M. V. Narasimhan** 709 Improving the convergence rate of the inverse iteration method

K. Jawahar Reddy and **K. Vijayakumar** 717 Lamination-dependent shear deformation models for cylindrical bending of angle-ply laminates

Qin Qing-Hua 727 Geometrically nonlinear analysis of shells by the variational approach and an efficient finite element formulation

Technical Notes

E. C. Kalkani 735 Expected displacements and stresses in the encasing concrete of a Francis turbine scroll case

D. Polyzois, W. J. Muzyczka and **J. D. Garroni** 741 Finite element analysis of cast iron spillway gate wheels

I Software Survey Section

NUMBER 5

Zhilong Zhou and **D. W. Murray** 749 An incremental solution technique for unstable equilibrium paths of shell structures

M. Ap. Tzaferopoulos and **G. E. Stavroulakis** 761 Optimal structural design via optimality criteria as a nonsmooth mechanics problem

L. Jiang, K. M. Liew, M. K. Lim and **S. C. Low** 773 Vibratory behaviour of delaminated honeycomb structures: a 3-D finite element modelling

J. Noorzaei, M. N. Viladkar and **P. N. Godbole** 789 Influence of strain hardening on soil–structure interaction of framed structures

J. Noorzaei, M. N. Viladkar and **P. N. Godbole**	797	Elasto-plastic analysis for soil–structure interaction in framed structures
H. Abbas, D. K. Paul, P. N. Godbole and **G. C. Nayak**	809	Reaction-time response of aircraft crash
D. Bushnell and **W. D. Bushnell**	819	Optimum design of composite stiffened panels under combined loading
K. Ray and **R. C. Kar**	857	Parametric instability of a sandwich beam under various boundary conditions
Baoguo Wu and **Xingwen Du**	871	Finite element formulation of radial tires with variable constraint conditions
L. S. Nair, G. Singh and **G. Venkateswara Rao**	877	Stability of shear deformable rectangular plates using refined finite element model
Y. L. Mo and **Y. F. Chang**	883	Application of base isolation concept to soft first story buildings
G. D. Stefanou and **S. E. Moossavi Nejad**	897	A general method for the analysis of cable assemblies with fixed and flexible elastic boundaries
K. Rama Raju and **M. N. Keshava Rao**	907	Elastoplastic behaviour of unstiffened and stiffened steel tubular T-joints
M. H. Omurtag and **A. Y. Aköz**	915	Isoparametric mixed finite element formulation of orthotropic cylindrical shells
		Technical Note
K. H. Low	925	Computer-aided selection of roller chain drives
	I	Software Survey Section

NUMBER 6

L. Karaoğlan and **A. K. Noor**	937	Sensitivity analysis of frictional contact response of axisymmetric composite structures
M. Kulkarni and **A. K. Noor**	955	Sensitivity analysis for the dynamic response of viscoplastic shells of revolution
M. Ohga, H. Takao and **T. Hara**	971	Natural frequencies and mode shapes of thin-walled members
M. I. Hoit, R. A. Cook and **P. M. Christou**	979	An integrated technique for the analysis of traffic lights and signs supported by the dual cable system
W. P. Howson, A. K. Jemah and **J. Q. Zhou**	989	Exact natural frequencies for out-of-plane motion of plane structures composed of curved beam members

C. P. Pantelides and **P. A. Nelson**	997	Continuous pulse control of nonlinear structures
G. Krizhevsky and **Y. Stavsky**	1007	Refined theory for non-linear buckling of heated composite shallow spherical shells
C. Bajer and **C. Bohatier**	1015	The soft way method and the velocity formulation
S. S. Lee	1027	Boundary element analysis of linear viscoelastic problems using realistic relaxation functions
Z. Fang	1037	Dynamic analysis of structures with uncertain parameters using the transfer matrix method
H. Shakourzadeh, Y. Q. Guo and **J.-L. Batoz**	1045	A torsion bending element for thin-walled beams with open and closed cross sections
C. M. Wang, G. M. Hong and **T. J. Tan**	1055	Elastic buckling of tapered circular plates
Won-Man Cho, Bang-Eop Lee, Song-Hoe Koo and **Young-Shin Lee**	1063	Effects of geometric and material nonlinearity on the stresses of various pressure vessel dome shapes
P. Roško	1077	Three-dimensional topology design of structures using crystal models
D. H. Bonde, J. T. Galagali and **M. S. S. Prabhu**	1085	Substructure effective mass for mode identification
B. F. Song and **W. Jiang**	1095	An equivalent linear method for structural system reliability with nonlinear safety margins
		Technical Notes
J. Mackerle	1101	Some remarks on progress with finite elements
T. M. V. Kaiser, A. E. Elwi and **A. Mioduchowski**	1107	Nonlinear harmonic analysis applied to axisymmetric structures
